Ondřej Nohava, B.Sc.

Student | Machine Learning Researcher | Software Developer

Address: Prague, Czech Republic
Email: nohava.ondrej1@gmail.com
LinkedIn: Ondřej Nohava
GitHub: **onohava**, nohavond

Work Experience

09.2026 – present **Machine Learning Researcher Intern**, ELI Beamlines, Prague, Czech Republic
- Python, LLMs, Generative models
- Developing physics-constrained flow matching model for laser-plasma accelerator simulation

05.2025 – 06.2026 **Machine Learning Researcher Intern**, Cisco, Prague, Czech Republic
- Python, Kotlin, Java, AWS, Azure, Databricks, LLMs
- Developed closed-loop framework for testing and securing LLMs

04.2024 – 05.2025 **Software Tool Developer**, Valeo, Prague, Czech Republic
- C++, Visual Studio, Parallel programming, CANoe, Python
- Scaled camera data acquisition application to handle higher-bandwidth camera and increased data throughput

09.2023 – 06.2024 **High School Teacher**, Anglicko-české gymnázium AMAZON, Czech Republic
- Informatics and Mathematics teacher

09.2023 – 06.2024 **Programming Teacher**, Dům dětí a mládeže Jindřichův Hradec, Czech Republic
- Introducing programming to elementary school students using Python and Scratch

Education

09.2024 – present **M.Sc., Computer Science**, Czech Technical University in Prague
- Specialization: Knowledge Engineering
- Enrolled in the prg.ai Minor; additional AI courses and participation in technical talks

01.2026 **Winter School on AI and Robotics**, EPITA, Paris, France
- Intensive two week specialization program focused on AI and Robotics

09.2025 – 01.2026 **M.Sc., Computer Science**, Université Laval, Quebec, Canada
- CREPUQ program for one semester abroad

09.2020 – 02.2024 **B.Sc., Computer Science**, Czech Technical University in Prague
- Specialization: Knowledge Engineering
- Bachelor thesis: Schelling games: when stubborn agents matter

09.2022 – 03.2023 **B.Sc., Computer Science**, Technical University of Munich, Germany
- Erasmus+ program for one semester abroad

Projects

- **Enhancing Diffusion Models using Koopman Autoencoders** [GitHub]
  Python, PyTorch
  - Implemented a novel approach to diffusion models to improve training efficiency
  - Analyzed spectral properties of the latent space to optimize reconstruction accuracy
- **Comparative Study on Magnitude Prediction in Earthquakes** [GitHub]
  Python, Scikit-learn, PyTorch
  - Conducted comparative analysis of regression models to predict earthquake magnitude

- **2D Platformer Game** [GitHub]
  C#, Unity
  – Developed a 2-player cooperative platformer based on a dynamic light and dark puzzle mechanic
- **Jihoceske Jamboree 2025 Website** [Live Site] · [GitHub]
  HTML/CSS, JavaScript
  – Built and deployed the official website for a major scouting event

Research

- **Data Science Summit**, Internal conference, March 2026, Cisco
  – Demo: *Pentesting Large Language Models*
- **VýLet**, Summer Research Program, May 2025, Czech Technical University
  – Research topic *Koopman Autoencoders with L2O*
- **Stigma Student Conference**, September 2023, Kruh u Jilemnice, Czech Republic
  – Speech on *The invertible elements of the monoid of dead-ending misère games*
- **Stigma Student Conference**, September 2022, Lučany nad Nisou, Czech Republic
  – Speech on *Schelling Games on Graphs*
- **VýLet**, Summer Research Program, May 2022, Czech Technical University
  – Research topic *Schelling Games on Graphs*

Additional Activities

- **Member of prg.ai**, Prague, Czech Republic
  – Attending conferences and technical talks
- **Competitive Programming**
  – Solving algorithmic problems on Codeforces, see my profile
- **Scout**, Junák – Czech Scouting, Czech Republic
  – Helping with organization and supervision

Languages

Czech	Native
English	C1
German	B1
Russian	A2

Skills and Interests

Python, C++, Machine Learning, Generative models, Large language models
